The Silver Hill Company-The Herris-Haggerty Deal-Big Day In Dividends Declared.

It is with pleasure that The Herald is able to state that everything is at last clear sailing with the Geyser-Marion company, operating in the wonderful gold camp of Mercur, as arrangements wore perfected yesterday whereby a settlement was effected in the Mosby vs. Geyser-Marion case, in which the supreme court decreed that a one-half interest in the Geyser claim, embraced in the company's holdings, rightfully belonged to the plaintiff in the case, the decision carrying with it an order that the company must pay to Mr. Mesby one-half of the net profits accruing during the time it has been worked and operated by the company. While the details of the settlement have not been made public and will not for some time to come, it is learned settlement was effected in the Mosby

have not been made public and will not for some time to come, it is learned that the terms are eminently satisfactory to all parties concerned, and it is stated that the settlement gives the association relief and release from the payment of any further damages, and at the same time it vests with the company full and complete title to Mr. Mosby's undivided one-half interest in the Geyser chaim, which, as a matter of fact, is but a small portion of the valuable property now owned by the company.

ocmpany.

The settlement of this dispute places the company on an excellent footing, and clears the calendar of the last vestige of litigation and of the numer-ous suits that have clouded the horizon vestige of litigation and of the numerous suits that have clouded the horizon of the incorporation ever since it began doing husiness in Camp Floyd district, the first suits being between the Geyser and the Marion companies, the consolidation of these rival corporations setting forever the disputes between them, and now that this Mosby case has been disposed of, there is no reason why the company should not enjoy tranquillity and prosperity in the future, as it will not be long before the amount due Mr. Mosby will be paid, when the company once more will be installed on a dividend-paying basis, having already distributed \$00,000 among its stockholders since the consolidation, the outlook for the company being especially bright, as it is understood that in the workings of the mine splendid bodies of good milling one are in sight, the property being in better shape at the present time than has ever been the case in its previous history.

The tone of the mining share market

als history.
tone of the mining share market would and should indicate what effect this settlement would have on the shires of the company, and its Geyser-Marion stock was buoyant and strong yesierday, it is believed that it will soon reach former figures in its quota-tions.

THE SILVER HILL COMPANY.

South Swansea Officials Embark In Another Mining Enterprise.

Incorporation papers were prepared and signed yesterday and will be filed tomorrow providing for the formation of emother strong Tintle mining com-pany, the new organization to sail un-der the cuphoneous title of the Silver Hill, a name that implies that the property of the company will enter the lisus a producer of the white metal ga-

The ground on which the incorpora-tion is based comprises the Silver Bel and the Silver Beil No. 2 claims, two lodes of known merit, which are located on the east side of Silver City, a por on the east side of Silver City, a por-tion of the property, in fact, being cov-ered by the site of this prosperous min-ing camp, and the main leaders of the enterprise are the men who have made a success of the South Swansea and who have placed this mine on a divi-dend-paying basis, the incorporators, directors and officials of the Silver Hill

dend-paying basis, the Incorporators, directors and officials of the Silver Hill being C. V. Wheeler, president; John Leyshon, vice president; J. T. Croxall, treasurer; W. H. Farnsworth, secretary; L. E. Riter and J. M. Wheeler.

A shaft of ninety feet has already been sunk in the development of this property, the hottom disclosing a small body of very high-grade silver ore, but in the further exploration of this promising ground. The Herald is informed that a new shaft will be sunk and that at soon as required, a steam hosts will be erected, in order that the workings may be pushed to the deep.

The company is capitalized at 300,000 shares, of a par value of 50 cents each, 100,000 shares of which will be set aside as working stock.

THE FERRIS-HAGGERTY DEAL. Owners of the Copper Mine Decide Not to Sell.

(Special Corresponden Rawlins, Wyo., Dec. 9.—The Herale correspondent learns that the recently reported sale of a half interest in the famous Ferris-Haggerty copper mine in the Battle Eake district, did not go through, and is now off, the original owners, Messrs, Ferris, Haggerty and Deal, having decided not to sell. There is, from the calculation of an expert. 18, 7000 worth of ore on the dump at the Rudefeln, the name of the prop-erty, and shipments are now being made to Chicago and Denver, the ore being harded to the raidroad over the

snow on sleds.

The Bryan mine, a recently discovered rich proposition, in the vicinity of the Rudefeha, is being worked by a large force. While the ore is not as rich in copper as that of the Rudefeha it increases in richness with depth Pay ore is already being taken out.

A BIG DAY IN MINING SHARES. Great Furore In Geyser-Marion-Lit tle Pittsburg Moves Upward.

The week's business on the floor

The week's business on the floor of the exchange yesterday was rounded out by beavy transactions in the pit, a number of surprises being sprung on the brokers, several securities disclosing strong upward tendencies during the call daring which many thousand gilt-edged shares changed hands.

At the opening, Ajax sold at 59 cents. Four Aces developed unexpected weakness, and before the close was transferred at 41% cents. When first called, Geyser-Marion gave no indication of the advances which were in store for this Mercur accurity, the initial transfer being at 72 cents, but long before the close steady gains were recorded, and the stock crept upward and onward until transactions were finally incorded at 87 cents, a number of sales being made for tuture delivery. Galeina participated in the dealings of the hour, but at about the quotations of the previous day, Mammoth being a ready seller at \$2.16. Lower Mammoth was also a dealer, while Northern Light was quiet and weak at the figures given below. Albe registered a transfer for the first time for several months more of this security being watted even at a higher figure, without drawing out any more of this pathe exchange yesterday was rounded months, more of this security being wanted even at a higher figure, without drawing out any more of this paper. Buckeye and Camp Floyd were dealers, and halton was not overlooked. Dexter finding a buyer at \$3.15, while Engle & Ellie Bell experienced a

Showstorm mine of the south, and the indications are that within the environments of this extensive group there will be found 4,500 feet of the extension of the bales, South Dalsy and Snowstorm strength, and before the close of the Dalsy, South Dalsy and Snowstorm ledge, to demonstrate which the company will do some extensive development work this winter and coming quotations, Showers Consolidated making its first sale on the board at 22 cents, while Star Consolidated was in earnest demand and was a seller at \$1.37 and \$1.37½. Valeo recorded extensive dealings, while Tetro sold at an advance, West Mountain Placer coming to the front with its maiden transfers.

The past week was above the average in mining stock transactions, and still the mining share market has not as yet reached its height.

The business for the day footed up as follows:

SALES OF STOCK.

most pure, showing, when the moisture is expelled, 29.1 per cent suiphate of soda. The re-estabilishment of the enterprise here will result in the employment of hundreds of men and will be of much benefit to the west in that both soda and glass will be much cheaper to the consumer.

Two Dividends Declared.

Faithful to the day the Mercur company toed the mark yesterday and declared its regular monthly dividend of 12½ cents a share, or \$25,000, payable on the 20th of the present month to stockholders of record on the evening of the 9th, and the shareholders of the company, when they pocket the crisp cheek distributed by the company of the stributed by the company in "velvet" money up to the handsome sum of \$1,241,000.

The directors of the Buillon-Beck Mining company also held a meeting yesterday and declared a dividend of 10 cents a share, of \$10,000, payable on the 15th, thus adding to its dividend credits, which is now crowding the two million and a half mark.

The Silver King paid its regular \$35,000 dividend yesterday, the Swansea dropped a wad amounting to \$10,000, while the Grand Central delighted its stockholders with its regular dividend of \$31,250, so that it will be seen this has been a prosperous month so far with the mines of Utah.

has been a prosperous month so far with the mines of Utah.

Gold Dust Will Resume.

The Herald is informed that tomorrow the Gold Dust Mining company will resume work in the extensive development of its valuable Mercur property, the intention being to begin operations in the old workings on the upper vein, where large bodies of good milling ore have already been exposed —ore carrying values ranging from 80 cents, \$6, \$8 and \$10 and even up to \$30, to the ton in gold-arrangements having been perfected for the extension of the drift further into the hill on this zone of mineral, while the chaft will be deepened to the second veln or helt, the uncovering of which will doubtless give the property a standing in the camp as a milling proposition, the probability will resume work in the extensive de-

the property a standing in the camp as a milling proposition, the probability being that by spring the mine will be embellished with reduction works. It is learned that the company is in excellent shape, financially, and it is safe to say that the coming year will see another paying mine in the great gold camp of Mercur in the property of the Gold Dust company.

Mr. Moore is interested with Mr. Du-paix in a lease on the Amelia, from which ore for milling is being hauled to Minersville, where Mr. Dupaix has to Minersyille, where Mr. Dupaix has his little Monte Cristo stamp mill about ready for work, it being the intention to keep the plant in continuous operation as long as possible this winter, while next summer it is expected to give a good account of itself.

Years ago Mr. Dupaix met with unqualified success with the Amelia mine and his stamp mill, and he is sanguine that he will duplicate if not improve upon all former records.

The Marsac Mill.

Hon. R. C. Chambers, superintendent of the Ontario, who has returned from Park City, informs The Herald that the Marsac mill is running successfully on Ontario mill tailings, and that the plant Ontario mill tailings, and that the plant is handling about eighty tons daily.

In speaking of the operations of the Marsac, Mr. Chambers stated that R. B. Watson, who has been in charge of the leaching department of the mill for the past five years, had departed on Thursday of last week for Mexico, to accept a position at San Luis Potosi as manager of both the mine and mill at that place and at a good salary. The common year much respect to the same of the mineowners of the Thursday of last week for Mexico, to accept a position at San Luis Potosi as manager of both the mine and mill at that place and at a good salary. The company very much regretted losing Mr. Watson, who is a man of ability and character and a gentleman who thoroughly understands his business. His place at the Marsac is now held down by George D. Blood of California, who is filling the position very satisfactorily to the company. torily to the company.

Mr. Chambers states that there is no probability that the Ontario mine will be started up again with a full force until some time next spring.

Mineral Surveys Ordered.

During the past week Surveyor General Blair ordered the making of mineral Blair ordered the making of mineral surveys for patent as follows:

A wagon road is being graded from the first ship ment of the season at the company to develop the intention of the specific the

is, seller Seller way for some months for the transfer of the sola works and seller way for some months for the transfer of the sola works and seller, with the proporation of the American Sola Glass & Chemical content and Members of the American Sola Glass & Chemical Chemic will be driffed upon in order to determine its extent and value, the Indications for the opening of a big producer being very flattering.

C. S. Kinney has returned from Tintic district, where he has been directing operations in the development of the property of the Gold Treasure Mining company, of which he is president. The Gold Treasure group is located in the south end of the district, not far from the Joe Bowers and Buckeye mines, and in its exploration a double-compartment shaft is being sunk to catch the vein on its dip. This shaft has altered a depth of sixty feet, and the management is sanguine that the day is not far off when another producing mine is added to the bonanza propositions of the district. Mr. Kinney, with R. B. Shepard, is now the dwarf of the Herkimer group, in Tintic district, which is located between the Centennial-Eureka mine and the Mammoth mill. J. M. O'Brien has been given a contract for the sinking of a double-compartment shaft in the development of this ground, besides which a shafthouse, blacksmith shop and other produced in strong brine, which will constitute the management is sanguine that the day is not far off when another producing mine is added to the bonanza propositions of the district. Mr. Kinney, with R. B. Shepard, is now the day is not far off when another produce a scene of brilliancy beyond the imagination of the most extravaluation of the most extravaluat

Whole Body a Mass of Sores. Doctor Could Not Cure. Tried CUTICURA.

Speedily Cured. Now Fine Hair And Clear Skin.

Our baby at the age of four months was sickly, and broke out with Eczema on his face and body. He was a mass of scabs. The doctor could not cure him. One day I saw your advertisement in the newspaper, and I got of CUTICURA (cintment), one bottle of Cury-CURA RESOLVENT, and thms cakes of CUTI-CURA SOAP, and he was cured. He is now seventeen months old, weighs 46 pounds, and has the finest head of hair and clearest skin you would want to see. LOUIS BENZINGER, Feb. 3, 1808. 2500 8th Axe., New York City.

ECZEMA ON LEG CURED BY CUTICURA

I had a sore on the upper part of my leg that three doctors called Ecrems. Such pain I never experienced in all my life. I read in the papers of Curicuma Russeures, and I hought the Curicuma Russeures, Curicuma Soar, and Curicuma (contiment).

The first time I used them was before I went to bed, and I slept more than hight than I had for two weeks before, and from that time on it got better, and to day it is entirely gone.

Teh 3. 1888. C. BUTCHEM. Meant for Poers.
